

Clinical and Community Partnerships

The University of Texas Medical Branch, School of Nursing (UTMB) -Masters of Science in Nursing NP programs

St. Vincent's Episcopal House

This is a partnership to provide primary care to individuals and families, who live in poverty, are uninsured and suffer from chronic diseases. This innovative model includes a partnership between the SON nurse practitioners, faculty, and nurse case managers.

Clinical and Community Partnerships

University of Texas Medical Branch, School of Nursing (UTMB-SON) - BSN Program
Texas Nursing Resource Center (TNRC)

The TNRC supplies two centralized nursing education services for schools of nursing and clinical agencies within the 13 county Houston – Galveston and Corpus Christi areas of Texas. The mission of the TNRC is to improve the quality of nursing care in Texas by expanding the use of the Centralized Clinical Placement System. This grant project is designed to assist other regions of Texas by sharing the site license for TNRC, providing resources for the modification of the TNRC website and system tools, assisting with orientation and implementation of the product, and by sharing experiences with other schools and clinical agencies.

Approximate cost of implementing and maintaining partnership: Not listed

Grant monies used: Centralized Activities (Texas Gulf Coast Region) funded by the Texas Higher Education Coordinating Board (THECB)

Expected benefits from partnership:

- increase enrollments

Challenges from partnership: none listed

Clinical and Community Partnerships

The University of Texas Medical Branch, School of Nursing (UTMB-SON) –
Masters of Science in Nursing – Executive Leadership
MD Anderson Cancer Center
University of Texas Medical Branch Health System

This is a partnership to prepare nurse leaders through an executive leadership program. Each year, five emerging leaders from each hospital system are selected to participate in the program.
